Education

University of Technology Sydney

Bachelor of Information Technology (WAM: 83.25)

Enterprise Software Development & Business Information Systems Management

Ultimo, NSW
December 2026

Projects

SDS Project Management Site | *React, TypeScript, Flask, Vite, Vitest, Pytest*

February 2026 – July 2026

Frontend Developer & QA Engineer

Project Link: <https://github.com/subject-modernization> | **Nominated for UTS 2026 Software Engineering Tech Fest showcase** | **Case-study page:** <https://yafie-portfolio-ten.vercel.app/projects/sds-modernisation>

- Built full-stack workflows for project brief submission, coordinator review, student discovery, join requests, scheduling, and allocation.
- Replaced scattered manual processes with searchable project catalogues, role-based visibility, status tracking, and admin allocation controls.
- Improved usability and reliability through validation fixes, responsive UI polish, testing, traceability, and handover documentation.

Lumora AI | *SwiftUI, MVVM, Core Data, FileManager*

February 2026 – May 2026

iOS Developer & Product Designer

Project Link: <https://github.com/jaeyunjks/SmartStudyCompanion> | **Nominated for UTS 2026 Software Engineering Tech Fest showcase**

- Designed and built a mobile-first study companion for organising notes, images, and PDFs into structured study workspaces.
- Created SwiftUI flows for workspace creation, material organisation, AI summaries, study actions, and learning continuity.

FreshBasket AWS Deployment | *AWS, Node.js, Express.js, EJS, MySQL, RDS*

May 2026

Full-Stack & Cloud Deployment Developer

Project Link: <https://github.com/jaeyunjks/AWSFreshBasket>

- Deployed a Node.js and MySQL vendor portal using Elastic Beanstalk, EC2, RDS, Load Balancer, Auto Scaling, and SNS.
- Configured VPC networking, security groups, environment variables, and EC2-to-RDS connectivity.
- Implemented customer request flows, admin status updates, seed data, and deployment documentation.

Experience

SDS Modernisation

Ultimo, NSW

Frontend Developer & QA Engineer

February 2026 – July 2026

- Collaborated with team members and SDS stakeholders to build a project management system for UTS Software Development Studio, supporting project submission, client communication, admin dashboard, student project discovery, and allocation workflows.
- Translated stakeholder needs into React/TypeScript interface improvements across admin, student, tutor, and client-facing workflows.
- Supported release readiness through requirement-based testing, regression checks, issue tracking, validation fixes, and handover documentation.

Skills

Technical: TypeScript, JavaScript, React, Next.js, Node.js, Express.js, Python, Java, MySQL, AWS, Git, Vitest, Playwright

Tools: Vercel, Elastic Beanstalk, RDS, EC2, Figma, VS Code, Jira
