EDUCATION

University of Technology Sydney - Bachelor of Information Technology

Expected Dec 2026

Major: Enterprise Software Development | Sub-major: Business Information Systems Management | WAM: 85.25 | GPA: 6.33

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, Java, Swift, C++, HTML, CSS

Frameworks & Backend: React, Next.js, Vite, SwiftUI, Tailwind CSS, Node.js, Express.js, NestJS, Flask, .NET, REST APIs, Prisma

Data, Cloud & Delivery: PostgreSQL, MySQL, AWS, Azure, RDS, EC2, Elastic Beanstalk, VPC, Docker, CI/CD, DevOps, Vercel, Render

AI & AI-Native Engineering: OpenAI API, LLM integration, AI agents, agentic workflows, RAG, MCP, knowledge grounding, human-in-the-loop systems, workflow automation

Testing, Security & Platforms: Automated testing, API testing, Vitest, Pytest, information security principles, security risk assessment, threat and vulnerability analysis, security controls, IAM concepts, ServiceNow AI Agent Studio, Flow Designer, Build Agent, Now Assist, Git, GitHub, Visual Studio, VS Code, Xcode, Jira, Figma

PROFESSIONAL EXPERIENCE

SDS Modernisation - Frontend Developer & QA Engineer

Feb 2026 - Jul 2026

University of Technology Sydney, Software Development Studio

Project: SDS Project Management Site | React, TypeScript, Vite, Python, Flask, REST APIs, Vitest, Pytest

GitHub: github.com/subject-modernization | **Case Study:** [portfolio/sds-modernisation](#)

- Contributed in a six-person client-facing Agile team, translating stakeholder requirements into role-based admin, student and client workflows through sprint planning, reviews and handover.
- Built a full-stack project management platform with React, TypeScript, Python, Flask and REST APIs, replacing manual proposal, discovery, join-request, scheduling and allocation workflows.
- Developed 12+ responsive interfaces and strengthened reliability through validation, edge-case handling, and unit, integration, end-to-end and regression testing with Vitest and Pytest.
- Maintained requirement traceability, QA documentation and release readiness for a project nominated for the UTS 2026 Software Engineering Tech Fest showcase.

TECHNICAL PROJECTS

ServiceNow ANZ HackNow 2026 – 1st Place | Capra.AI (ValueFlow) | ServiceNow, AI Agent Studio, Flow Designer, Service Portal, Now Assist

Silver Service — *AI-powered citizen services prototype*

2026

- Built Silver Service in a four-person team that won 1st place, using specialised ServiceNow AI agents and agentic workflows to automate eligibility support for older Australians and their trusted circles.
- Designed eligibility, consent, relationship and permission data models and flows with AI Agent Studio, Flow Designer and Build Agent, applying knowledge grounding and human-in-the-loop controls.

Hospital Operations Management System (HOMS) - Staff & Shift Management | HTMX, Python, Flask, SQL, Docker, REST APIs, Ollama, CI/CD

2026

- Developed the Staff & Shift Management microservice within a five-service hospital platform, building Flask/SQL REST APIs for staff, shifts, assignments, availability, eligibility and workforce coverage across independently deployed frontend, backend and database services.
- Containerised services with Docker and implemented CI/CD and extensive automated testing; integrated Ollama/Llama staff-ranking support with output validation and deterministic fallbacks, while applying agentic Plan-Act-Observe-Adapt workflows and working with RAG and MCP patterns.

Lumora AI | SwiftUI, MVVM, NestJS, TypeScript, PostgreSQL, Prisma, OpenAI API

2026

GitHub: github.com/jaeyunjks/SmartStudyCompanion

- Built an AI-powered study companion with SwiftUI/MVVM and NestJS/TypeScript, integrating 10+ REST endpoints, PostgreSQL/Prisma persistence and OpenAI API summarisation for notes, PDFs and image workflows.

FreshBasket AWS Deployment | Node.js, Express.js, EJS, MySQL, AWS

2026

GitHub: github.com/jaeyunjks/AWSFreshBasket

- Built and deployed a vendor portal using Node.js, Express.js, EJS, MySQL and AWS for produce box requests, admin product management, request status updates and operational workflows.
- Configured 7+ AWS services, including Elastic Beanstalk, EC2, RDS, Load Balancer, Auto Scaling, SNS and VPC networking to support scalable hosting and reproducible deployment.

SELECTED ACHIEVEMENTS

- 1st Place – ServiceNow ANZ HackNow 2026, Capra.AI team.
- Nominated for the UTS 2026 Software Engineering Tech Fest showcase for SDS Project Management Site and Lumora AI.
