Education

University of Technology Sydney

Bachelor of Information Technology (WAM: 85.25 | GPA: 6.33)

Enterprise Software Development & Business Information Systems Management

Ultimo, NSW
December 2026

Projects

SDS Project Management Site | *React, TypeScript, Vite, Python, Flask, Vitest, Pytest*

February 2026 – July 2026

Frontend Developer & QA Engineer

Project Link: <https://github.com/subject-modernization> | **Nominated for UTS 2026 Software Engineering Tech Fest showcase** | **Case-study page:** <https://yafie-portfolio-ten.vercel.app/projects/sds-modernisation>

- Built full-stack role-based project management platform for UTS Software Development Studio, replacing manual proposal, review, discovery, join-request, scheduling, and allocation workflows.
- Developed React/TypeScript interfaces integrated with Python/Flask APIs across admin, student, and client-facing user journeys.
- Improved workflow reliability through validation fixes, edge-case handling, responsive UI refinements, and comprehensive testing including unit tests, integration tests, and end-to-end tests, along with regression testing and requirement traceability.

Lumora AI | *SwiftUI, Swift Concurrency, MVVM, NestJS, PostgreSQL, Prisma, OpenAI API*

February 2026 – May 2026

iOS Developer & Product Designer

Project Link: <https://github.com/jaeyunjks/SmartStudyCompanion> | **Nominated for UTS 2026 Software Engineering Tech Fest showcase**

- Built a full-stack iOS study companion for organising notes, images, and PDFs into structured learning workspaces.
- Developed SwiftUI/MVVM screens with Swift Concurrency and integrated a NestJS/TypeScript backend (PostgreSQL, Prisma, OpenAI) to support AI summaries, file handling, and study workflows.

FreshBasket AWS Deployment | *AWS, EJS, Node.js, Express.js, MySQL, RDS*

May 2026

Full-Stack & Cloud Deployment Developer

Project Link: <https://github.com/jaeyunjks/AWSFreshBasket>

- Built and deployed a vendor portal for produce box requests, admin management, product data, and status updates.
- Deployed the app using Elastic Beanstalk, EC2, RDS MySQL, Load Balancer, Auto Scaling, and SNS.
- Configured VPC networking, security groups, environment variables, database connectivity, and deployment documentation.

Experience

SDS Modernisation

Ultimo, NSW

Frontend Developer & QA Engineer

February 2026 – July 2026

- Collaborated with SDS stakeholders to deliver a project management system for UTS Software Development Studio using Agile methodologies, participating in daily standups, client meetings, and retrospective sessions.
- Translated stakeholder requirements into React/TypeScript interface improvements across admin, student, and client-facing workflows, including mobile-friendly interfaces for student and client views.
- Contributed to Agile sprint planning, issue tracking, UI refinements, validation fixes, regression checks, and release preparation & supported project handover through QA documentation, requirement traceability, testing notes, Tech Fest showcase preparation, and assisted with deployment activities.

Skills

Technical: TypeScript, JavaScript, Python, Java, Swift, C++, React, Next.js, Node.js, Express.js, NestJS, MySQL, AWS, Vitest

Tools: Git, GitHub, Vercel, Render, Elastic Beanstalk, RDS, EC2, Figma, VS Code, Xcode, Jira
